DETAILED FEATURE SCENARIOS MANUAL

A complete operational mapping of test scenarios, inputs, outputs, and financial rules

Operational Blueprint & Test Scenarios

A module-by-module walkthrough of features and their corresponding accounting logs

Scope: Every Platform Module + Test Scenarios

Written in compliance with standard double-entry and FTA accounting systems

Doc Version: 3.0 - Date: August 2026

Section 1: User Identity & Authorization Boundaries

[SC-1.1] Standard Tenant Owner Login

OBJECTIVE: Authenticate the corporate administrator with full permissions.

STEPS:

1. Open /login in browser.
2. Fill in credentials.
3. Click Sign In.

INPUTS: email: 'owner@digitaldive.ae', password: 'admin'

EXPECTED OUT: Returns signed JWT token session. Renders all sidebar tabs (Sales, Purchases, Ledger, Audit Logs, Settings). Sets 'active_user_role' to OWNER.

[SC-1.2] Register New Cashier (Auto-Password)

OBJECTIVE: Establish cashier access mapping under the corporate tenant.

STEPS:

1. Navigate to Organizations & Access settings.
2. Click Assign Employee access.
3. Fill in name, email, and select role BILLER_CASHIER. Leave password empty.
4. Submit form.

INPUTS: name: 'Fatima Al Mansoori', email: 'fatima@company.ae', role: 'BILLER_CASHIER'

EXPECTED OUT: Backend generates an 8-character random password. Saves user, dispatches email to fatima@company.ae showing the credentials, and adds user to dashboard list.

[SC-1.3] Account Deactivation Enforcement

OBJECTIVE: Deactivate employee access and verify login logout.

STEPS:

1. Open Details modal of the user.
2. Click Deactivate User.
3. Log out and attempt to log in using the deactivated credentials.

INPUTS: User ID of Fatima Al Mansoori

EXPECTED OUT: Deactivates user in database. Subsequent login attempts throw 401 Unauthorized exception: 'This account has been deactivated. Please contact your administrator.'

[SC-1.4] Role-Based Route Restriction

OBJECTIVE: Verify that a biller/cashier cannot view general ledger or audit logs.

STEPS:

1. Log in as cashier Fatima.
2. Attempt to navigate directly to /ledger or /settings/audit via address bar.

INPUTS: Cashier role session

EXPECTED OUT: Redirects back to overview dashboard or triggers access restriction layout. Sidebar completely filters out forbidden menu links.

Section 2: Parties Setup & Item Catalog

[SC-2.1] Register UAE TRN-Registered Customer

OBJECTIVE: Create customer profile with a valid Tax Registration Number.

STEPS:

1. Navigate to Parties & Customers.
2. Click Create New Party.
3. Select Customer. Enter Name, Email, and 15-digit UAE TRN.
4. Submit.

INPUTS: name: 'Al Futtain Group LLC', email: 'billing@alfuttain.ae', TRN: '100293847500003'

EXPECTED OUT: Inserts party record to DB. Customer statement ledger initialized. TRN format validated successfully.

[SC-2.2] Register Non-VAT Retail Consumer

OBJECTIVE: Create customer profile for a consumer without tax registration.

STEPS:

1. Navigate to Parties & Customers.
2. Click Create New Party.
3. Select Customer. Enter Name. Leave TRN blank.

INPUTS: name: 'John Doe'

EXPECTED OUT: Inserts customer record without TRN. System flags customer as standard consumer (5% VAT is still calculated, but consumer TRN is omitted from printed tax invoice).

[SC-2.3] Add Standard Taxable Inventory SKU

OBJECTIVE: Establish catalog item subject to standard 5% UAE VAT.

STEPS:

1. Navigate to Item Catalogue.
2. Click Add New Item.
3. Fill in name, SKU, price, purchase cost, and set Tax Category to Standard Rated (5%).

INPUTS: name: 'Dell XPS 13 Laptop', SKU: 'DELL-XPS-001', price: 4000.00 AED, cost: 3000.00 AED, taxCategory: 'Standard'

EXPECTED OUT: Creates item record. Initial stock count initialized to 0. Cost of goods sold ledger mapping bound.

[SC-2.4] Add Tax-Exempt Service SKU

OBJECTIVE: Create service item not subject to VAT calculations.

STEPS:

1. Navigate to Item Catalogue.
2. Click Add New Item.
3. Fill in details and select Tax Category: Exempt.

INPUTS: name: 'Corporate Consultation Service', price: 1500.00 AED, taxCategory: 'Exempt'

EXPECTED OUT: Item successfully created. Sales calculations will bypass 5% tax surcharge.

Section 3: Sales Invoicing & Ledger Postings

[SC-3.1] Draft Invoice Calculations

- OBJECTIVE:** Verify tax math on draft invoice with mixed taxable items.
- STEPS:**
1. Navigate to Sales & Invoices -> Create Tax Invoice.
 2. Select customer 'Al Futtaim'.
 3. Add 1 Dell Laptop (4000.00 AED, 5% VAT).
 4. Add 1 Consultation Service (1500.00 AED, Exempt).
 5. Check subtotal, tax, and grand totals.
- INPUTS:** 1x DELL-XPS-001, 1x Consultation Service
- EXPECTED OUT:** Subtotal: 5500.00 AED, Tax (5% of 4000): 200.00 AED, Grand Total: 5700.00 AED.
- DOUBLE ENTRY:** *None (Draft invoices do not post financial records)*

[SC-3.2] Post Standard Sales Invoice (Credit Sale)

- OBJECTIVE:** Lock invoice, assign sequential invoice number, and post journal entries.
- STEPS:**
1. Open Draft Invoice from SC-3.1.
 2. Click Post Invoice.
- INPUTS:** Invoice ID from SC-3.1
- EXPECTED OUT:** Status changes to POSTED. Edit/Delete actions disabled. PDF generated and locked. Final sequential Invoice No assigned (e.g. INV-2026-0001).
- DOUBLE ENTRY:**
- Debit Accounts Receivable (Al Futtaim) = 5700.00 AED*
 - Credit Sales Revenue (Laptop) = 4000.00 AED*
 - Credit Sales Revenue (Consultation) = 1500.00 AED*
 - Credit Output VAT Ledger = 200.00 AED*

[SC-3.3] Process Cash Invoice Sale

- OBJECTIVE:** Issue sales invoice settled immediately with cash.
- STEPS:**
1. Navigate to Invoices -> Create Invoice.
 2. Select Cash Customer.
 3. Add standard laptop item (4000.00 AED).
 4. Set Payment mode to Cash Ledger.
 5. Click Post Invoice.
- INPUTS:** 1x DELL-XPS-001, Cash Payment
- EXPECTED OUT:** Status immediately marked as PAID. Transaction locked.
- DOUBLE ENTRY:**
- Debit Cash Account = 4200.00 AED*
 - Credit Sales Revenue = 4000.00 AED*
 - Credit Output VAT Ledger = 200.00 AED*

[SC-3.4] Issue Credit Note (Sales Return)

- OBJECTIVE:** Issue tax credit note for returned laptop and reverse ledger records.
- STEPS:**
1. Open posted invoice INV-2026-0001.
 2. Click Issue Credit Note.
 3. Select returned laptop item and amount.
 4. Post Credit Note.
- INPUTS:** Returned Dell Laptop from INV-2026-0001
- EXPECTED OUT:** Generates credit note record (e.g. CN-2026-0001). Deducts returned laptop from sales calculations. Stock level is restored.
- DOUBLE ENTRY:**
- Debit Sales Returns = 4000.00 AED*
 - Debit Output VAT Ledger = 200.00 AED*
 - Credit Accounts Receivable (Al Futtaim) = 4200.00 AED*

Section 4: POS Billing & Cashier Counters

[SC-4.1] Standard POS Checkout

OBJECTIVE:	cashier processes retail sales at front counter.
STEPS:	1. Navigate to POS Billing Counter. 2. Scan barcode or click laptop icon. 3. Click Checkout. 4. Input Cash paid 4200.00 AED. 5. Click Complete Sale.
INPUTS:	1x DELL-XPS-001 laptop, Payment: Cash
EXPECTED OUT:	Saves sale as PAID. Renders ESC/POS layout to console terminal. Clears cart for next customer.
DOUBLE ENTRY:	<i>Debit POS Cash Account = 4200.00 AED</i> <i>Credit Sales Revenue = 4000.00 AED</i> <i>Credit Output VAT = 200.00 AED</i> <i>Debit Cost of Goods Sold = 3000.00 AED</i> <i>Credit Inventory Asset = 3000.00 AED</i>

[SC-4.2] Split Payment Checkout

OBJECTIVE:	cashier collects invoice total split across cash and card.
STEPS:	1. Navigate to POS Billing Counter. 2. Add items to cart (Total: 4200.00 AED). 3. Click Checkout. 4. Input Split payment: 2000.00 Cash, 2200.00 Card. 5. Complete Checkout.
INPUTS:	Total 4200.00 AED, Split: 2000.00 Cash, 2200.00 Card
EXPECTED OUT:	Receipt printed successfully. Cashier ledger totals updated.
DOUBLE ENTRY:	<i>Debit POS Cash Account = 2000.00 AED</i> <i>Debit Bank Card Account = 2200.00 AED</i> <i>Credit Sales Revenue = 4000.00 AED</i> <i>Credit Output VAT = 200.00 AED</i>

Section 5: Purchase Bills & Supplier Payables

[SC-5.1] Record Supplier Purchase Bill

OBJECTIVE:	Purchase inventory from supplier on credit, tracking recoverable input tax.
STEPS:	1. Navigate to Purchases & Bills. 2. Click Record Purchase Bill. 3. Select Supplier 'Al Serkal Group' (TRN verified). 4. Add Laptop Item, Qty: 10, cost: 3000.00 AED. 5. Post Bill.
INPUTS:	10x Laptops, Unit Cost: 3000.00 AED (5% recoverable VAT)
EXPECTED OUT:	Increments inventory stock by 10 units. Supplier statement balance increases by 31500.00 AED.
DOUBLE ENTRY:	<i>Debit Inventory Asset = 30000.00 AED</i> <i>Debit Recoverable Input VAT = 1500.00 AED</i> <i>Credit Accounts Payable (Al Serkal) = 31500.00 AED</i>

[SC-5.2] Supplier Bill Settlement Payment

OBJECTIVE:	Issue check to supplier and reconcile payables ledger balance.
STEPS:	1. Navigate to Supplier Statement / Purchases. 2. Click Record Payment. 3. Input payment amount and bank ledger. 4. Match to purchase bill from SC-5.1.
INPUTS:	Amount: 31500.00 AED, Payment Mode: Bank Check
EXPECTED OUT:	Reduces supplier payable balance to 0. Match reference stored on both journal transactions.
DOUBLE ENTRY:	<i>Debit Accounts Payable (Al Serkal) = 31500.00 AED</i> <i>Credit Bank Account = 31500.00 AED</i>

Section 6: Warehouse Stock & Depot Transfers

[SC-6.1] Inter-Warehouse Depot Stock Transfer

OBJECTIVE:	Transfer physical laptops from primary warehouse to retail outlet branch.
STEPS:	1. Navigate to Warehouse Stock. 2. Click Inter-Warehouse Transfer. 3. Source: 'Dubai HQ Warehouse', Dest: 'Dubai Mall Outlet'. 4. Item: DELL-XPS-001, Qty: 5. 5. Post Transfer.
INPUTS:	5x Dell Laptops transferred
EXPECTED OUT:	Updates stock balance in real-time. Dubai HQ Warehouse decreases by 5 laptops. Dubai Mall Outlet increases by 5 laptops.
DOUBLE ENTRY:	<i>None (Stock transfers represent warehouse location movements and do not change overall inventory asset value)</i>

[SC-6.2] Inventory Damage Write-Off Adjustment

OBJECTIVE:	Adjust stock for damaged laptops written off as expense.
STEPS:	1. Navigate to Warehouse Stock. 2. Click Record Stock Adjustment. 3. Select Warehouse and Laptop SKU. 4. Action: Decrease stock, Qty: 1, Cost: 3000.00 AED. 5. Reason: 'Water Damage'. 6. Submit.
INPUTS:	1x laptop, Cost: 3000.00 AED, Reason: Water damage
EXPECTED OUT:	Decrements inventory by 1 laptop. stock audit log records adjustment notes.
DOUBLE ENTRY:	<i>Debit Inventory Adjustment Expense = 3000.00 AED</i> <i>Credit Inventory Asset (Dell Laptop) = 3000.00 AED</i>

Section 7: Employee Payroll & Payslip Broadcast

[SC-7.1] Process Monthly Payroll Accrual

OBJECTIVE:	Accrue gross salary, allowances, and deductions for an accountant.
STEPS:	1. Navigate to Employees & Payroll. 2. Click Process Payroll for Employee 'Amir Al-Mansoori'. 3. Select Month and Year. 4. Click Post Payroll.
INPUTS:	Basic Salary: 14500.00 AED, Allowances: 2500.00, Deductions: 800.00
EXPECTED OUT:	Accrues wages payable in general ledger. Renders printable pay slip draft.
DOUBLE ENTRY:	<i>Debit Wage & Salary Expense (Gross) = 17000.00 AED</i> <i>Credit Wages Payable = 16200.00 AED</i> <i>Credit Employee Deductions Liability = 800.00 AED</i>

[SC-7.2] Payslip Email Broadcast

OBJECTIVE:	Send HTML payslip to employee's email.
STEPS:	1. Navigate to Employees & Payroll. 2. Click Send Payslip. 3. Verify notification status.
INPUTS:	Employee: Amir Al-Mansoori, Month: July 2026
EXPECTED OUT:	EmailService generates and broadcasts the payslip. If SMTP simulator is active, credentials dump to backend terminal.

Section 8: Federal Tax Authority VAT 201 Filing

[SC-8.1] Generate Form VAT 201 Tax Return

- OBJECTIVE:** Compile tax report to verify Box 1 (Output) and Box 10 (Input) VAT balances.
- STEPS:**
1. Navigate to Financial Reports -> VAT 201 Return.
 2. Select Tax Period Q2 2026.
 3. Click Compile Report.
- INPUTS:** Period: Q2 2026 (Posted Transactions)
- EXPECTED OUT:** Compiles VAT Return:
- Box 1a (Standard Rated supplies): Sales total 8000.00, VAT 400.00 AED
 - Box 10 (Recoverable Purchases): Purchases total 30000.00, VAT 1500.00 AED
 - Box 14 (Net VAT Payable/Refundable): Refundable balance of 1100.00 AED.

[SC-8.2] Fiscal Period Close & Lockout

- OBJECTIVE:** Lock historical period to block backdated ledger postings.
- STEPS:**
1. Navigate to Settings -> Fiscal Periods.
 2. Click Lock Period for Q2 2026.
 3. Attempt to post a sales invoice dated back in Q2 2026.
- INPUTS:** Lock period request, backdated invoice supply date
- EXPECTED OUT:** Restricts ledger entry. The posting transaction throws exceptions blocking entries into locked fiscal periods.

Section 9: Offline-First SQLite Synchronization

[SC-9.1] Offline Invoicing & Outbox Queue

- OBJECTIVE:** Save sales transactions locally when desktop client goes offline.
- STEPS:**
1. Shut down local backend API.
 2. Open POS Desktop app.
 3. Complete transaction checkout. Observe invoice details.
- INPUTS:** 1x DELL-XPS-001 laptop, connection: OFFLINE
- EXPECTED OUT:** Transaction is saved locally in SQLite with status LOCAL_SAVED. Local outbox sync queue appends one mutation payload with a unique idempotency key.

[SC-9.2] Background Outbox Reconciliation

- OBJECTIVE:** Restore backend connection and check outbox push sync.
- STEPS:**
1. Start dev backend API server.
 2. Open POS Sync tab.
 3. Click Sync Now.
- INPUTS:** Local outbox containing SC-9.1 mutation
- EXPECTED OUT:** Background worker sends mutation payload via POST /sync/push. Server validates idempotency key, commits invoice to PostgreSQL. Client receives 200 OK, deletes local outbox row, and updates status to SYNCED.
